

Contract Manufacturing Services

BMP utilises state-of-art equipment and provides custom manufacturing services such as; pleating, die cutting, slitting, ultrasonic welding, over moulding and assembly for a wide variety of filtration applications.

BMP is able to pleat media ranging from 4mm to 55mm with a pleat pack length of up to 80" wide. Multiple layers and multiple pleat heights can be integrated within the same pleat pack.

BMP is flexible and proficient in providing rapid sample turnaround. We work closely with equipment manufacturers concerning the design and prototyping of filters, to assist with the optimisation of the performance of the filter media.

Filter Processing Equipment - 2.2 Meter JCEM CNC - Digital Pleating Machine

1. Multiple pleat heights.

2. Multiple layers pleated within the same pleat pack.

3. Die-cut and pleat pack configurations.
